

Is There

Is there
out there
somewhere
one
who could love
this sterile septuagenarian
his budding manhood
ravaged
by cellular super replication
and its poison
cure?

After it all
after all
he did produce
one dead sperm

There is
something
to his offerings
to the world
is there not?

Could one conceive
his possible
impossible
child
who could only be
a miracle?

And if so
would heaven bestow
the further miracle
the radiant dream
of our bonding
in glory
in our very own
Motherland
Eden?
