

## The Terror of Socialism

O you who are terrified of the word Socialism  
who would gleefully continue destroying our planet  
who continue denying the most obvious truths  
who fear and hate the other in whatever form they exist

You who abhor the idea of a stronger safety net for those less privileged  
who helping thy neighbor means only if that neighbor is like me  
and if they're like me, they shouldn't need help  
who refuse to understand that social justice and socialism  
can be one and the same

Our wanton, greed-based capitalism is killing us  
Our voracious grabbing can only work for so long  
And its time is up The kickback has started  
and it won't confine itself to those unlike you

Have you noticed?  
Not yet? Still in denial? What'll it take  
half your family taken by the scourge?

The human race must adapt to survive  
That means taking care of each other and our planet  
instead of continually pillaging nature  
and over-engorging the few

Let's get our terror hierarchy straight  
We have a great opportunity to make things better for us all  
If not, they will only get universally worse
