

NovaTechfx

On July 26th, 2022, I invested \$480 in NovaTech. Within four months, I added \$1618 for a total of \$2098. As of 4/21/23, I received an average profit every week of 2.53%. I pay a \$25 service fee once a month for a then total of \$175. At one point I tried to withdraw \$1300. I soon learned it was at a time of crisis for the company. It wasn't sent for five weeks at which time I cancelled it. For their letter about the crisis, [click here](#). When the crisis passed, I withdrew \$178.75 without a hitch. The conversion and transfer fees were \$14.09. My total income from the weekly 2.53% was \$1731.83. With optional, automatic, compound reinvesting, my original investment of 2098 had become \$3461.99, a total profit in nine months of \$1542.74. Cynthia and Eddy Petion, the Florida couple who founded and run NovaTech, are wonderful, honest, caring, generous people. They want to make money. But they want to help those with less, as well. They've been doing this for four years and I believe will continue for many more. If I'd succeeded at recruiting affiliates, my income would have been far more. No one is currently under me. And, of course, the more one invests, the more one gets. For the big investors, the service fee is waived.

StableDAO

StableDAO makes you work for your money. I have two accounts with them, the Family Pack for \$700 and the Standard Pack for \$300. There are many others, as well. You get six people under you in the Family Pack making seven members. The Standard Pack is one person. Every week I read one ezine for the Family Pack and a second for the Standard and fill out one and two surveys respectively. Every week I get \$30.40 in the Family Pack, \$6.40 for me and six each for the six below me. I get \$15 for the two surveys in the Standard Pack. So, for learning about finances and the Blockchain world and around forty-five minutes of reading and filling out surveys, I get \$45.40 every week. Each package has an earning limit, \$200 for the Family Pack and \$900 for the Standard. But the total earnings each week for the Family only counts the \$6.40 for the 'head of the family', not the other 24. So it aggregates slowly. When the maximum earning is reached, one must repurchase the package to continue. This is Sam Lee's brainchild. He's super wealthy and successful, brilliant, honest and caring with a lot of integrity. Here too, one's income would multiply with affiliates. Sam Lee recently created a new entity called WAAS, We Are All Satoshi. You're now better off getting into that instead of StableDAO unless you want the education you'd get there. [Email](#) me.

Happy Miner

Go [here](#) and get ten free dollars. Go in every day and compound 8% till you reach \$100. Then buy their \$100 package or add more anywhere along the way. I believe this one's solid, as well.

Avoid

Nova-Look and HyperNation or any of their related enterprises. They're crooks.
